

TRIM™ SC686

Enhance your Precision Machining and Grinding Operation with TRIM™ SC686

Experience unmatched performance with TRIM SC686, formulated for the most demanding machining and grinding. TRIM SC686 offers superior results and extended tool life, making it ideal for precision machining across most materials. Choose TRIM SC686 to transform your quality, productivity, and overall performance.

KEY SELLING POINTS

- Enhanced Performance: Our advanced EP (Extreme Pressure) Additive Package delivers exceptional tool life and surface finish in high-speed machining and grinding.
- Operator-Friendly: Low odor and mist ensuring a more pleasant and safer work environment.
- Outstanding Corrosion Protection: Offers superior resistance against corrosion on both ferrous and nonferrous metals.
- Extended Sump Life: Requires less frequent makeup, helping to lower operating costs and reduce downtime.
- Versatility: Effectively works with a wide range of metals, including aluminum alloys, cast iron, copper, and steels.
- Highly Compatible: Ideal for automotive machining of aluminum alloys, including ADC12.

UNIQUE FEATURES

- Environmentally Conscious: Free from heavy metals, nitrites, and phenolic compounds, contributing to a cleaner and safer environment.
- Low Residue: Keeps machines cleaner with a soft fluid film, reducing maintenance efforts.

PACKAGING OPTIONS

20-liter Pail

204-liter Drum

1000-liter Tote

Experience the advantages of TRIM™ SC686 in your operations.
