

Announcing Boeing Full Aerospace Approval!

# TRIM<sup>®</sup> MICROSOL<sup>®</sup> 590XT

Advanced Technology Aerospace Semisynthetic

INNOVATIONS  
FOR LONGER SUMP  
AND TOOL LIFE

A Pacific Northwest aerospace manufacturer machines aluminum, titanium, stainless, and Inconel<sup>®</sup> for Tier 1 and Prime OEM customers. Their previous coolant had the necessary aerospace approvals, but still caused odor, residue, and foaming issues. With a switch to MicroSol 590XT foam, foul odor, and residue problems are gone, and they record excellent tool life, surface finish, and overall cost savings.

See your production soar with the cutting-edge TRIM<sup>®</sup> MicroSol<sup>®</sup> 590XT.

Specifically developed to secure aerospace approvals, MicroSol 590XT meets the industry's most stringent specifications. Looking for unsurpassed sump life? Absolute foam control? Protection for sensitive alloys?

MicroSol 590XT maximum-lubricity semisynthetic, microemulsion delivers it all— along with reduced downtime and increased profitability.

**Choose MicroSol 590XT:**

- > protects sensitive aerospace and nuclear-material alloys from surface stains and corrosion
- > contains no boron or DCHA, no need for tankside additives
- > unmatched lubricity and surface finish
- > dramatically extends sump life for substantial time and material savings
- > exceptional foam control; low carry-off
- > multi-metal, multi-operation versatility
- > superior corrosion inhibition
- > no chlorine, triazine, formaldehyde releasers, phenols, or secondary amines

**Use MicroSol 590XT especially for:**

- > titanium, aluminum, steel, stainless steel, and Inconel<sup>®</sup>
- > high-pressure, high-volume applications
- > alternative to chlorinated soluble oils on high-silica aluminum alloys
