### **Master Fluid Solutions® Introduces Versatile TRIM® C118 Synthetic Metalworking Fluid**

*Innovative, High-performance cutting and grinding fluid provides next generation cooling, exceptional foam control, machine cleanliness, and corrosion protection.*

Perrysburg, Ohio, December 19, 2022 – Master Fluid Solutions® is proud to announce the newest synthetic coolant to join their signature North American TRIM® portfolio: [TRIM C118](#). The precision grinding fluid is compatible with a wide range of materials, including cast irons, stainless, steel alloys, ceramics, glass, and composites.

“TRIM C118 is designed as a product to expand on the performance of our bestselling TRIM C115,” explains Justin Geach, Global Director of Marketing. “Our customers have come to rely on our synthetic cutting and grinding fluids for their ease of maintenance, clean profiles, low carryoff, reduced waste, and incredible cost savings. C118 is the perfect addition to the category, and our field experts are excited to showcase its impact on our customers’ operations.”

C118’s state-of-the-art formula enables exceptional foam control and cooling ability in challenging and precision grinding operations. The fluid allows chips to settle quickly for easy filtration. The synthetic leaves a thin, protective film on workpieces and cutting tools without the tackiness of traditional synthetics, minimizing downtime for cleaning. With superior tramp oil rejection, C118 maintains a long life in the sump without any tank-side additives. The low-odor formula also improves overall operation acceptance.

This latest generation synthetic fluid is available for sale throughout North America. Click [here](#) to learn more about TRIM C118 and request a free trial of C118 [here](#).

**About Master Fluid Solutions** — Master Fluid Solutions, working closely with the worldwide metalworking community, develops and markets a full line of environmentally sound, extremely durable and stable cutting and grinding fluids, straight oils, parts cleaners, pipe and tube expansion, forming, and corrosion control fluids under the TRIM®, WEDOLIT™, and Master STAGES™ brands. Master Fluid Solutions’ XYBEX® fluid management systems lower their customers’ total cost of operations. Master Fluid Solutions is committed to the safety of the people who use their products, the protection of the planet, and the overall impact on their customers’ profitability. Master Fluid Solutions is proud to have been named in the Top 10 in “Top Workplaces” in the Toledo, OH area for seven consecutive years.
