POPULAR METALWORKING FLUIDS, AT-A-GLANCE

Across Europe, TRIM® is the preferred brand of many OEMs and subcontractors who need quality coolants to ensure high performance and cost effective machining. Many products and variants complete this range from Master Chemical Europe but for its new Product Guide, the company has focused on the most popular.

This simple four page leaflet has been designed to provide a quick and clear reference to the most frequently specified formulations. It guides the reader through the top synthetics, semi-synthetics, oils and emulsions providing a short description of product strengths and typical applications. In simple terms, it also quantifies the mineral oil, extreme pressure (EP) and polar additives content of each product.

The Master Chemical Europe Product guide is freely available from the company's sales office on tel: 01449 726800 or email: info@masterchemical.co.uk

About Master Chemical Corporation: Master Chemical Corporation was founded on November 13, 1951. Since then, working closely with the worldwide metalworking community, Master Chemical Corporation has developed and marketed a full line of specialty cutting and grinding fluids, cutting oils, concentrated washing and cleaning compounds, and rust preventives all under the TRIM® brand trademark. These products are both environmentally sound and when used in conjunction with Master Chemical's XYBEX® Coolant Recycling and Filtration Systems, are the most durable and stable products available anywhere today. Master Chemical has always been committed to the safety of the people who use our products, the protection of our planet, the environment we live in, and the overall impact on our customers' profitability. Master Chemical serves customers globally. For further information please contact a local distributor near you <http://www.2trim.us/distributors.php>, call us at (44) + (0) 1449 726800, or visit our web site at www.masterchemical.com
