HIGHLY STABLE UNIVERSAL SOLUBLE OIL **... Master Chemical introduces a new variation**

When Master Chemical introduced its TRIM® E708 cutting and grinding fluid concentrate it swiftly found favour in Europe's multi-metal job shops. The company had formulated a universal coolant whose stable and predictable performance belied its low cost.

Within the framework of continuous product development Master Chemical Europe has now introduced a new variation of this highly popular fluid. TRIM® E715 has all the features and attributes of TRIM® E708 but contains no formaldehyde donor biocides.

Formulated and tested in Master Chemical's European laboratory, TRIM® E715 contains an alternative biocide package to ensure its long sump life. This is a legislation driven development as certain EU countries have placed restrictions on the use of formaldehyde donor biocides in metalworking fluids.

Although not a revolutionary introduction, TRIM® E715 extends the scope of TRIM® E708 that continues to do an excellent job for a modest price. Both require minimal maintenance even in the most demanding of fluid management systems and have the chemical and mechanical lubricity for medium to high duty machining and grinding.

Like its forerunner, TRIM® E715 is extremely hard water tolerant and is very low foaming. This extremely fine soluble oil emulsion is compatible with a wide range of ferrous and non-ferrous metals. Notably, field trials have proved its ability to achieve a particularly good surface finish on aluminium. It has also been formulated to run effectively for long periods without the need for costly additives.

About Master Chemical Corporation: Master Chemical Corporation was founded on November 13, 1951. Since then, working closely with the worldwide metalworking community, Master Chemical Corporation has developed and marketed a full line of specialty cutting and grinding fluids, cutting oils, concentrated washing and cleaning compounds, and rust preventives all under the TRIM® brand trademark. These products are both environmentally sound and when used in conjunction with Master Chemical's XYBEX® Coolant Recycling and Filtration Systems, are the most durable and stable products available anywhere today. Master Chemical has always been committed to the safety of the people who use our products, the protection of our planet, the environment we live in, and the overall impact on our customers' profitability. Master Chemical serves customers globally.
