TRIM® Solutions Product Guide

INNOVATIONS FOR LONGER SUMP AND TOOL LIFE

	TRIM® Product	Mineral Oil	EP Additives	Polar Additives	Product Description
Synthetics	TRIM® C116	0	-	-	Very low foam synthetic product for grinding cast iron and steels. Very good filterability.
	TRIM® C270	0	-	+	Very low foam, high-performance synthetic for form grinding and machining aerospace parts. Approved by Rolls-Royce, General Electric, Safran Group and Pratt & Whitney.
	TRIM® C272	0	-	+	Boron free version of TRIM C270. Approved by Rolls-Royce, General Electric and Safran Group.
Semisynthetics	TRIM® SC440	<10	-	-	Boron and formaldehyde free, low oil semisynthetic for machining and grinding of cast iron and steel. Extremely biostable and very low foaming.
	TRIM® SC415	20	-	-	Premium, medium oil semisynthetic for machining and grinding of ferrous parts. Extremely biostable and low foaming.
neo-synthetics	TRIM® HyperSol™ 888NXT	0	+++	++++	Premium product for aerospace industry with exceptional performance on hard-metals and superior lubricity for machining soft aluminium alloys. Approved by Rolls-Royce, Dassault and Safran Group. Conforms to Airbus AIMS 12-10-001. Mineral oil, boron, chlorine and formaldehyde free.
Microemulsions	TRIM® MicroSol™ 456	20	+	+	Low foam, clean running microemulsion for steel and cast iron machining and grinding. Boron and formaldehyde free.
	TRIM® MicroSol™ 515	30	++	+	Premium, microemulsion for machining and grinding of ferrous parts and aluminium. Extremely biostable and hard water tolerant.
	TRIM® MicroSol™ 519	20	++	++	Premium, boron free microemulsion for machining and grinding of ferrous parts and aluminium. Extremely biostable and hard-water tolerant.
	TRIM® MicroSol™ 530	20	++	+++	Premium, boron free microemulsion for machining aluminium and steel alloys. Extremely biostable and very low foaming even in soft water.
	TRIM® MicroSol™ 585XT	35	+++	+	Premium, high oil microemulsion for machining all materials incl. aluminium. Especially good for titanium milling. Approved by Boeing, Pratt & Whitney and Rolls-Royce.
	TRIM® MicroSol™ 590XT	20	+++	++	Premium, boron free microemulsion for machining aerospace alloys, aluminium and titanium aerostructure parts. Airbus, Boeing, Bombardier and Safran approved.
	TRIM® MicroSol™ 690XT	35	+++	+++	Premium, very high lubricity boron free microemulsion for machining all materials. Especially good for aluminium when a good surface finish is vital.
Emulsions	TRIM® E715	50	+	+++	Premium, general purpose product for all metals; formaldehyde free, low foam, very good stability and machine cleanliness.
	TRIM® E720	50	+	++	Amine, boron and formaldehyde free emulsion for all materials. Especially good for yellow metals. Cleaner running and lower foam than other brands.
	TRIM® E806	55	+++	+++	Premium product for aerospace machining applications. Incredible tolerance of Mg2+ ions ensures unprecedented sump life when machining magnesium alloys. Non-staining to even the most sensitive alloys.
	TRIM® E850	55	++	+++	Low-foaming emulsion for high-pressure, high-lubrication applications. Excellent machining performance. Boron & formaldehyde free. Approved by Pratt & Whitney.
	TRIM® E923	35	+++++	++++	Boron and formaldehyde free emulsion with extremely high EP content. Used in the most difficult applications, often replacing neat oils.
	TRIM® E950	50	+	++++	Extremely high-performance but clean running emulsion product for the toughest applications. Very low foam even in soft water. Fully approved by Rolls-Royce.

Contact us

Let us create a detailed, fact-based, customised analysis to prove just how much we can save your operation in time, material, and cost, while improving quality, with the premium coolant just right for your production.
