TRIM® C290

GENERAL-PURPOSE SYNTHETIC FOR ALUMINIUM

TRIM C290 is a synthetic metalworking fluid optimized for the chemical, environmental, and machining requirements of general aluminium parts. C290 is a high performance, easy to use and maintain, metal removal fluid with very high levels of usable lubricity at the point-of-cut. C290's unique chemical formula allows great, non-ferrous corrosion prevention on most aluminium alloys.

TRIM® C290 ADVANTAGES:

- Great resistance to corrosion on non-ferrous materials including aerospace aluminium 6061, 7075, 2024, 3000
- Water-clear, low-foaming and low-misting, C290 is easy to work with and manage
- Provides good results in a wide range of grinding and machining operations
- Easily removed from parts for easy clean-up before assembly, painting, or plating operations
- PRTR compliant, no SARA 313 reportable chemistry
- Very low carryoff and long sump life results in low operating cost

FORMULATED WITHOUT THE USE OF:

- Chlorine
- Nitrites
- Phenols
- Triazine
- PRTR materials
- SARA 313 listed ingredients
- Silicone
- Sulphur

AVAILABLE SIZES:

1-gallon jug
SKU: C290-1G
UPC-12: 64123808235

5-gallon pail
SKU: C290-5G
UPC-12: 64123808237

54-gallon drum
SKU: C290-54G
UPC-12: 64123808238

270-gallon tote
SKU: C290-270G
UPC-12: 64123808239
