

TRIM® E715

HIGH QUALITY, MULTI-METAL EMULSION

TRIM E715 is a high quality, universal soluble oil which requires minimal maintenance in even the most demanding fluid management systems. It has broad application in machining and grinding on a wide range of materials. The high levels of both chemical and mechanical lubricity in this product handle the medium to high duty machining and grinding jobs. The stable and predictable performance of TRIM E715 makes it a first choice for high-quality, consistent parts manufacturing.

TRIM® E715 ADVANTAGES:

- Very stable formula provides long operational life with consistent performance
- Extremely hard water tolerant
- Non-chlorinated and non-sulphurised extreme pressure (EP) additives control built-up edge (BUE)
- Extremely fine emulsion reduces carry-off for low total operating cost
- Fast wetting to get the fluid to the point of cut and fully coat the work piece and chips for superior corrosion prevention
- Suitable for machining aluminium alloys, steel alloys, nickel alloys, cast iron and yellow metals
- Will run effectively for long periods without the need for costly additives

FORMULATED WITHOUT THE USE OF:

Chlorine, formaldehyde releasers, nitrites, phenolic compounds and sulphurised EP additives

AVAILABLE SIZES:

1-gallon jug
SKU: E715-1G
UPC-12: 641238081791

5-gallon pail
SKU: E715-5G
UPC-12: 641238081814

54-gallon drum
SKU: E715-54G
UPC-12: 641238081821

270-gallon tote
SKU: E715-270G
UPC-12: 641238081838
