

MEETING THE CHALLENGES OF THE OIL AND GAS INDUSTRY

TRIM[®] E715

Cutting and Grinding Fluid Concentrate

For a dependable, hard-working, hard-water tolerant soluble oil, put TRIM[®] E715 to work for your operation.

Need a highly stable, long-life, quality emulsion that requires minimal maintenance? Look no further than E715.

Even in the most demanding fluid management systems, durable E715 gives reliable, predictable performance for medium- to high-duty machining, grinding operations, and OCTG threading on a wide range of materials. Produce high-quality, consistent parts with the highly versatile E715.

Choose E715:

- > very stable; minimal maintenance
- > extremely hard water tolerant
- > compatible with aluminium alloys, steel alloys, cast iron, and yellow metals
- > suitable for OCTG threading and general machining of wellheads, valves, and drill parts
- > very stable, long-life formula for consistent performance
- > formaldehyde donor-biocide free
- > nonchlorinated and nonsulphurised EP additives control built-up edge
- > very fine-particle emulsion gets fluid to the point of cut and reduces carryoff
- > high chemical/mechanical lubricity
- > fast wetting; gets fluid to the point of cut
- > superior corrosion prevention
- > easily recycled or disposed of without special handling or equipment
- > will run effectively for long periods without the need for costly additives
