

For Outstanding Stamping Operations of Aluminium and Other Metals

WEDOLiT FS 4710 is a low viscous, solvent-based lubricant for stamping and forming operations of steel, aluminium and non-ferrous metals.

The undiluted product can be applied by spraying, flooding, brushing or by rollers.

Choose WEDOLiT FS 4710

- > Good spreading behaviour, which leads to a uniform wetting of metal surfaces
- > Stable load carrying capacity and a homogeneous sliding behaviour
- > Reduces friction and wear, contributing to longer tool life
- > Usage leads to cleaner surfaces and achieving dimensional accuracy
- > If the product is finely dispersed, it evaporates after a short time without leaving any residue. Therefore, additional cleaning steps are not necessary. Otherwise, it is easily removable with organic solvents or alkaline industrial cleaners
- > Flash point: > 66°C

Why Choose WEDOLiT

- > Over 80 years of experience and knowledge of supplying metalworking industries
- > Leading-edge technology solutions for Corrosion Protection, Cold Forming and Tube and Pipe Manufacturing
- > High performance products that offer increased durability, process reliability and productivity
