

Universal Forming and Cutting Oil with Approval by Rattunde & Co.

WEDOLiT N 52 is a mineral-oil based high-performance lubricant, suitable for all kinds of minimum quantity lubrication systems such as milling, sawing or thread forming steel, aluminium and non-ferrous metals.

It is approved by Rattunde & Co as a cutting oil for minimum quantity lubrication (MQL).

Choose WEDOLiT N 52

- > Stable load carrying capacity and a homogeneous sliding behaviour
- > Very good wetting ability and film formation without adhesion
- > Outstanding cooling and lubrication properties lead to significantly reduced friction and wear contributing to longer tool life
- > Usage leads to clean surfaces and contributes to achieving dimensional accuracy
- > Only economical application is needed
- > Easily removable with organic solvents or alkaline industrial cleaners
- > Flashpoint: > 180°C

Why Choose WEDOLiT

- > Over 80 years of experience and knowledge of supplying metalworking industries
- > Leading-edge technology solutions for Corrosion Protection, Cold Forming and Tube and Pipe Manufacturing
- > High performance products that offer increased durability, process reliability and productivity
