

## High Performance Chlorine-Free Universal Stamping and Forming Oil

WEDOLiT FN 4455-55 is a low viscous, water-insoluble lubricant for heavy forming operations using steel, stainless steel and non-ferrous metals.

With a combination of EP additives, it offers truly outstanding performance for precision cutting operations. The undiluted product is usually applied by spraying, dipping, brushing or rolling.

## Choose WEDOLiT FN 4455-55

- > Stable load carrying capacity and a homogeneous sliding behaviour
- > Reduces friction contributing to longer tool life
- > Outstanding wetting ability and film formation without adhesion
- > Stable cold start behaviour, prevents stick-slip and chatter
- > Leads to clean surfaces and contributes to dimensional accuracy
- > Easily removable with organic solvents or alkaline industrial cleaners
- > Flash point: > 165°C

## Why Choose WEDOLiT

- > Over 80 years of experience and knowledge of supplying metalworking industries
- > Leading-edge technology solutions for Corrosion Protection, Cold Forming and Tube and Pipe Manufacturing
- > High performance products that offer increased durability, process reliability and productivity
